The Pinpoint Edge:

A Clear Advantage...

Get Comfortable: We call it "use-ability". You will find Pinpoint's products are easy-to-use, versatile, portable, and compact.

Get Practical: You will have the power to avoid machinery breakdowns and wasted manpower by diagnosing issues on the fly - no more waiting for outside service people or relying on inferior solutions.

Get Expertise: Benefit from the knowledge that comes from over 100 years of combined engineering experience in alignment and measurement.

A Smart Decision...

Quality = Empowerment: Rest easy, Pinpoint's products are built to last and designed to be dependable, allowing for better planning and maximizing your production capacity.

Innovation = Solutions: Our innovative turn-key products provide real-time solutions that you can rely on. Have a unique problem? We can develop a custom solution to your alignment demands utilizing our engineering and product design capability.

A Solid Investment...

What's the ROI? Our products will provide you with a fast, significant return on your investment by reducing downtime, optimizing workflow and increasing output quality - improving your bottom line today and for years to come.

Why Pinpoint? You can be confident knowing you are purchasing from the leading manufacturer of alignment and measurement products for 20 years. Our innovative products are found in factories across the USA and the world, in small to large companies, including Siemens, Boeing, GE and the United States Armed Forces. Pinpoint Laser Systems is a globally responsible, green company, featuring products that are made in the USA in a state of the art manufacturing facility.

Why Pinpoint?

10 Reasons:

There's more to it than just accurate measurements. Here's 10 of the many reasons to choose Pinpoint Laser Systems as your laser alignment and measurement provider.

- 1 Our products put the power of good tooling and measuring capability in the hands of your employees so that you can diagnose and fix your machinery problems however and whenever you need to, without reliance on outside service bureaus.
- 2 We're the leading manufacturer of precision laser measuring and alignment products for industry.
- 3 Our innovative products are found in factories throughout the United States and all over the world.
- 4 Our large selection of laser measuring and alignment products improve manufacturing efficiency, reduce downtime and increase profitability.
- 5 Our products are easy to use, highly versatile and compact.
- 6 Our products deliver measuring resolution of 0.0001 inch and work over distances of 180 feet and more.
- 7 We also offer world class custom alignment solutions as needed.
- 8 Our talented and dedicated staff possesses a wealth of experience in system design and support.
- 9 We possess a state of the art manufacturing facility.
- 10 Pinpoint Laser Systems has been solving customer alignment problems for 25 years.

Pinpoint's Customers

When your manufacturing is mission critical, Pinpoint's solutions deliver performance through precision - enabling increased efficiency, reduced downtime, and improved profitability.

“ The sales department was very knowledgeable and the technical department was very thorough. The Microgage 2000 was exactly what we needed. We are extremely happy with the results. ”

Dr. Joshua R. Williams, Senior Scientist
XStream Systems, Inc.

“ This is just an update for you and a testimony to the great help that your product was in assisting us during our installation and maintenance work and shutdown periods. We installed the wedge blocks with ease and they performed in the very same manner. Great product! ”

Jeffery W. Evans
Westinghouse Electric Co., LLC

“ One thing that stands out and has been commented on by all who have seen the equipment is its design and build quality. It is a beautifully engineered and built piece of equipment, which is a pleasure to use. Well Done! ”

Nenad Sarcevic, Engineer
Airbus UK

“ We are having great success with this unit (Microgage 2D Universal Kit) in moving my machines this year. ”

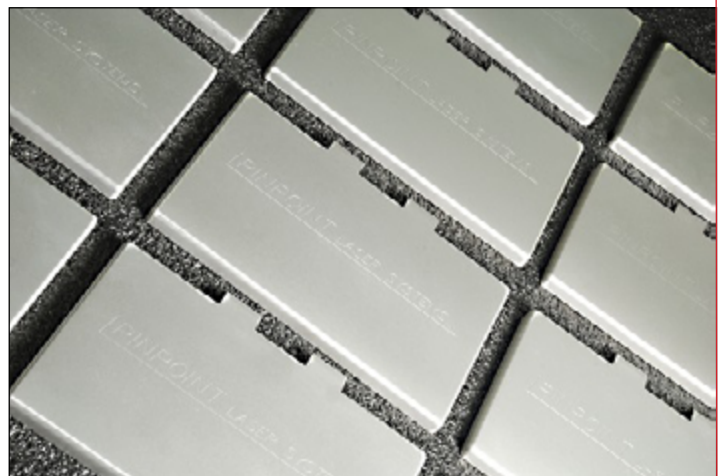

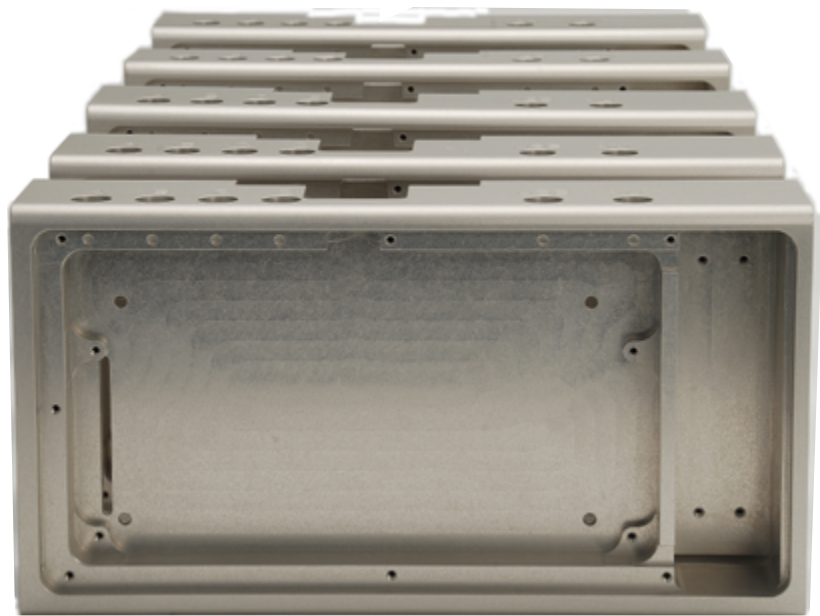

Martin Usher
Apollo Machine

Quality.

You Can See It.
You Can Feel It.

- Products that are built to last.
- Made of solid machined metal.
- Hand assembled and inspected.
- Proudly made in the USA.

Customizable

Versatile

Precise

Pinpoint Laser Systems is a leading manufacturer of precision laser measuring and alignment products for industry.

Our innovative products are found in factories throughout the United States and all over the world. We offer a wide line of laser measuring alignment products that will help you solve manufacturing problems, improve manufacturing efficiency, reduce downtime and increase profitability. Pinpoint's line of trusted products is easy to use, highly versatile and compact. You can set up our products right on your machinery and start gathering information that will allow you to solve production problems and optimize your workflow.

Since 1992, Pinpoint has been manufacturing a broad line of easy-to-use products that incorporate lasers, optics, electronics, and solidly built mechanical features. Manufacturing customers in many industries as diverse as semiconductor equipment to pet food, use these products which deliver measuring resolution of 0.0001 inch and work over distances of 200 feet, for both routine and complex measuring and alignment tasks.

Pinpoint's measuring equipment is actively used in aerospace, power generation, machine shops, paper and textile mills, shipbuilding, plastic and film production as well as electronic assembly, to name a few. Pinpoint has worked closely over the years with many manufacturers to develop and offer custom alignment solutions for robotic applications, medical scanning devices, aircraft assembly, electronic part fabrication and numerous other applications.

The company's dedicated staff provides a wealth of experience in system design, manufacturing, product testing and system support. In addition, the company maintains close ties to many local companies and resources in the technology-rich Route 128 and I-495 eastern Massachusetts region.
