

The Precision Tripod Mount provides excellent stability for the Microgage Laser transmitter and other alignment accessories, such as the 4-Axis Precision Mount, the Leveler Rotational Mount, the 90-Line, the 90-Line Square Plane, and much more. A Microgage Receiver can also be attached to this tripod as an endpoint for aligning long machinery runs.

This tripod's solid metal construction provides exceptional stability for use on the factory floor, as well as in the field for machinery installations and service projects. The height is adjustable between 18" up to 82" and secure locking mechanisms keep the legs and center support column in tight alignment. Solid foot pads provide good stable footing with a cross brace lock for added strength and stability.

### Features:

- Adjustable height from 18" to 82"
- Solid metal construction supports 250 pounds
- Geared column for 12" of fine vertical adjustment
- 3 independent, sturdy leg locks
- Rubber non-skid feet with retractable points
- Includes nylon in carrying bag
- Weighs 15 pounds
- 1 Year Warranty/Product Support

### Applications:

- Supports Microgage Laser and adjustment mounts
- Ideal mounting for receivers and 90-Line Right Angle
- Sturdy mount for laser alignments on the plant floor
- Portable for field service and installation work
- Well suited for mill and roll alignment jobs
- Perfect for machine shop alignment and runout checks
